

# Spin-Off- OELEC ENERGY S.L.

Creator: Eva M. García Frutos- Senior Scientist at ICMM

OELEC ENERGY is a new technological innovation spin-off that aims to provide breakthrough advances in organic electronics. It has been created by Dr. Eva María García Frutos, tenured scientist of the CSIC Materials Science Institute of Madrid. OELEC ENERGY is a new translational initiative that pursues the search for green, sustainable, and efficient energies. Thus, the technology developed by OELEC ENERGY will generate great advances in the field of organic electronic that will entail improved productivity, competitiveness, and sustainability of the sector.
